

Data Description

1. Case with all cloud physics

xi0_normal.nc (1.3 Mb)

This contains the initial control for the case with all physics. Variables include:

dimensions:

```
nptsdim = 1035 ;  
nlevdim = 35 ;  
nvardim = 9 ;  
nensdim = 1 ;
```

variables:

```
float lon(nptsdim) ;  
float lat(nptsdim) ;  
float lev(nlevdim) ;  
float pres(nlevdim) ;  
float vertfac(nlevdim) ;  
float x(nensdim, nvardim, nlevdim, nptsdim) ;
```

The 9 initial variables are T, Q, CLW, ICE, CLDS, CVCLD, P, QP, and TP

xf0_normal.nc (575 Kb)

This contains the final control for the case with all physics. Variables include:

dimensions:

```
nptsdim = 1035 ;  
nlevdim = 35 ;  
nvardim = 4 ;  
nensdim = 1 ;
```

variables:

```
float lon(nptsdim) ;  
float lat(nptsdim) ;  
float lev(nlevdim) ;  
float pres(nlevdim) ;  
float vertfac(nlevdim) ;  
float x(nensdim, nvardim, nlevdim, nptsdim) ;
```

The 4 final variables are T, Q, CLW, and ICE

xi_normal.nc (1.3 Mb)

This contains the initial ensemble for the case with all physics. Variables include:

dimensions:

```
nptsdim = 1035 ;  
nlevdim = 35 ;  
nvardim = 9 ;  
nensdim = 1054 ;
```

variables:

```
float lon(nptsdim) ;  
float lat(nptsdim) ;  
float lev(nlevdim) ;  
float pres(nlevdim) ;  
float vertfac(nlevdim) ;  
float x(nensdim, nvardim, nlevdim, nptsdim) ;
```

The 9 initial variables are T, Q, CLW, ICE, CLDS, CVCLD, P, QP, and TP

xf_normal.nc (575 Kb)

This contains the final ensemble for the case with all physics. Variables include:

dimensions:

```
nptsdim = 1035 ;  
nlevdim = 35 ;  
nvardim = 4 ;  
nensdim = 1054 ;
```

variables:

```
float lon(nptsdim) ;  
float lat(nptsdim) ;  
float lev(nlevdim) ;  
float pres(nlevdim) ;  
float vertfac(nlevdim) ;  
float x(nensdim, nvardim, nlevdim, nptsdim) ;
```

The 4 final variables are T, Q, CLW, and ICE

2. Case with no precipitation

xi0_noprecip.nc (1.3 Mb)

This contains the initial control for the case with no precipitation. Variables include:

dimensions:

```
nptsdim = 1035 ;  
nlevdim = 35 ;  
nvardim = 9 ;  
nensdim = 1 ;
```

variables:

```
float lon(nptsdim) ;  
float lat(nptsdim) ;  
float lev(nlevdim) ;  
float pres(nlevdim) ;  
float vertfac(nlevdim) ;  
float x(nensdim, nvardim, nlevdim, nptsdim) ;
```

The 9 initial variables are T, Q, CLW, ICE, CLDS, CVCLD, P, QP, and TP

xf0_noprecip.nc (575 Kb)

This contains the final control for the case with no precipitation. Variables include:

dimensions:

```
nptsdim = 1035 ;  
nlevdim = 35 ;  
nvardim = 4 ;  
nensdim = 1 ;
```

variables:

```
float lon(nptsdim) ;  
float lat(nptsdim) ;  
float lev(nlevdim) ;  
float pres(nlevdim) ;  
float vertfac(nlevdim) ;  
float x(nensdim, nvardim, nlevdim, nptsdim) ;
```

The 4 final variables are T, Q, CLW, and ICE

xi_noprecip.nc (1.3 Mb)

This contains the initial ensemble for the case with no precipitation. Variables include:

dimensions:

```
nptsdim = 1035 ;  
nlevdim = 35 ;  
nvardim = 9 ;  
nensdim = 1054 ;
```

variables:

```
float lon(nptsdim) ;  
float lat(nptsdim) ;  
float lev(nlevdim) ;  
float pres(nlevdim) ;  
float vertfac(nlevdim) ;  
float x(nensdim, nvardim, nlevdim, nptsdim) ;
```

The 9 initial variables are T, Q, CLW, ICE, CLDS, CVCLD, P, QP, and TP

xf_noprecip.nc (575 Kb)

This contains the final ensemble for the case with no precipitation. Variables include:

dimensions:

```
nptsdim = 1035 ;  
nlevdim = 35 ;  
nvardim = 4 ;  
nensdim = 1054 ;
```

variables:

```
float lon(nptsdim) ;  
float lat(nptsdim) ;  
float lev(nlevdim) ;  
float pres(nlevdim) ;  
float vertfac(nlevdim) ;  
float x(nensdim, nvardim, nlevdim, nptsdim) ;
```

The 4 final variables are T, Q, CLW, and ICE

2. Case with only precipitation

xi0_onlyprecip.nc (1.3 Mb)

This contains the initial control for the case with only precipitation. Variables include:

dimensions:

```
nptsdim = 1035 ;  
nlevdim = 35 ;  
nvardim = 9 ;  
nensdim = 1 ;
```

variables:

```
float lon(nptsdim) ;  
float lat(nptsdim) ;  
float lev(nlevdim) ;  
float pres(nlevdim) ;  
float vertfac(nlevdim) ;  
float x(nensdim, nvardim, nlevdim, nptsdim) ;
```

The 9 initial variables are T, Q, CLW, ICE, CLDS, CVCLD, P, QP, and TP

xf0_onlyprecip.nc (575 Kb)

This contains the final control for the case with only precipitation. Variables include:

dimensions:

```
nptsdim = 1035 ;  
nlevdim = 35 ;  
nvardim = 4 ;  
nensdim = 1 ;
```

variables:

```
float lon(nptsdim) ;  
float lat(nptsdim) ;  
float lev(nlevdim) ;  
float pres(nlevdim) ;  
float vertfac(nlevdim) ;  
float x(nensdim, nvardim, nlevdim, nptsdim) ;
```

The 4 final variables are T, Q, CLW, and ICE

xi_onlyprecip.nc (1.3 Mb)

This contains the initial ensemble for the case with only precipitation. Variables include:

dimensions:

```
nptsdim = 1035 ;  
nlevdim = 35 ;  
nvardim = 9 ;  
nensdim = 1054 ;
```

variables:

```
float lon(nptsdim) ;  
float lat(nptsdim) ;  
float lev(nlevdim) ;  
float pres(nlevdim) ;  
float vertfac(nlevdim) ;  
float x(nensdim, nvardim, nlevdim, nptsdim) ;
```

The 9 initial variables are T, Q, CLW, ICE, CLDS, CVCLD, P, QP, and TP

xf_onlyprecip.nc (575 Kb)

This contains the final ensemble for the case with only precipitation. Variables include:

dimensions:

```
nptsdim = 1035 ;  
nlevdim = 35 ;  
nvardim = 4 ;  
nensdim = 1054 ;
```

variables:

```
float lon(nptsdim) ;  
float lat(nptsdim) ;  
float lev(nlevdim) ;  
float pres(nlevdim) ;  
float vertfac(nlevdim) ;  
float x(nensdim, nvardim, nlevdim, nptsdim) ;
```

The 4 final variables are T, Q, CLW, and ICE
